Established in 1992 at Turkey Istanbul Betsan Cam Seramik Sanayi Ve Ticaret A.S. Is the leading company in glass mosaic production sector.

Betsan is able to store 1.000.000 m² mosaic in its factory, producing 10.000 m² for 23.000 m² indoor area for hundreds of different customers all over the world.

Betsan is fully aware of the importance of environmental protection and all glass used as raw material is 100% recyclable. Betsan is sensitive to the environment and has all the quality certificates.

Betsan has always adopted an innovative approach and is the first manufacturer of the silycord system, which has been developed for fast and excellent mosaic application using advanced technology.

New lifestyles demand new products. Betsan is leader in creation of differentiated spaces. Innovation becomes not merely an aim. We are a referent for our customers and the partner that can guide them across the trends and changes in the market. Collections conceived through to the last detail with a sense of warmth to the touch. All those are elements that have led to the recognition of Betsan A.S. a reference company in the field of glass mosaic tiles.

aqua

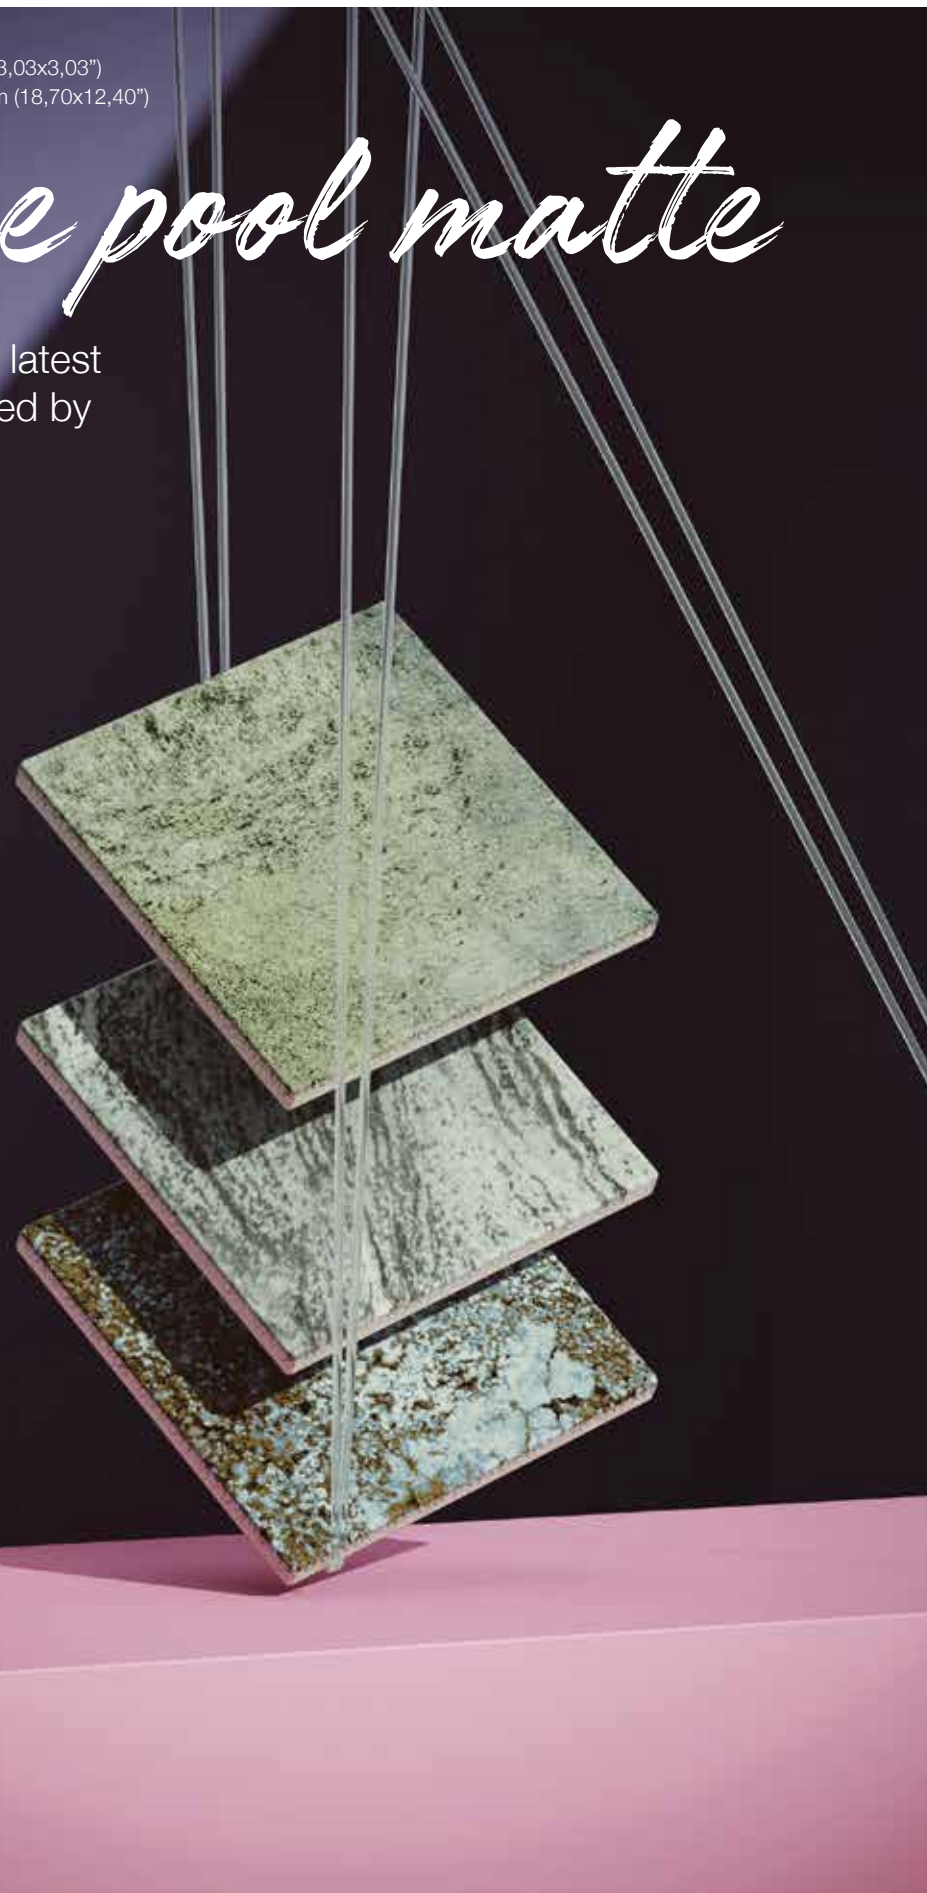

Environmental and ecological problems are increasingly affecting design and aesthetic trends in the field of architecture. The AQUA Collection is the result of recent research by Betsan glass mosaics. The state-of-the-art production process and matte and glossy surface finishes make the AQUA pool glass mosaic collection unprecedented in terms of realism.

Silycord System

It provides maximum adherence with more than 95 % adhesion surface for the back of the mosaic.

It has 100 % grout area.

Silycord® Polyurethane System does not break, its flexible and resistant structure provides stronger adhesion of the mosaics to the surfaces on which they are applied.

In dot-mounted systems: the products exposed to moisture and varying ambient temperatures cannot be stocked for long periods due to its non-flexible material structure and causes destruction in the plates during application.

Silycord® provides the mosaics to be stocked for long time and just like the first day each season thanks to its heat and moisture-resistant polyurethane structure.

With Silycord® system, the application process is carried out practically, as defect-free and by seeing the mosaic plate.

Provides 40 % fast application thanks to its plate size.

Mosaic Laying Advice

1 PREPARATION OF THE SURFACE

The surface to be laid must be completely smooth and white. A different color can damage the aesthetic appearance of the result.

2 MARKING PROCESS

According to EN12004 C2 adhesive should be used. The adhesive should be spread evenly on the 2m² surface with the flat side of the trowel. The adhesive is combed with 2-3 thick edges of the trowel.

3 PLACING THE MOSAICS

Mosaic plates are placed on the adhesive spreading surface by pressing with a rubber trowel. Precise observation may be required to ensure equal joint spacing between plates.

4 COMMON APPLICATION

Grouting is done after making sure that the adhesive is dry. Joints should be clean, dry and free of dust. The mortar should be spread between the mosaics with a trowel and then spread to cover all the gaps. Joint residues that may occur after the floor covering should be removed before it dries.

5 CLEANING

Cleaning process is started after the joints have dried. With a wet and clean sponge, the mosaic surfaces and joint gaps together with the entire application area are wiped until the brightest appearance is obtained.

GLASS MOSAIC TEST PERFORMED INFORMATION

TEST	RESULT
ANSI A137.2 Section 7.7 <i>Bond Strength</i>	Passes
DCOF Acutest <i>Dynamic Coefficient of Friction</i>	Avg .51 - .53
ASTM C648 <i>Breaking Strength</i>	Passes
ASTM C650 <i>Chemical Resistance</i>	No Effects Class A
ASTM C1026-13 <i>Freeze Thaw</i>	Passes

MAINTENANCE

Standard household glass cleaner, or a neutral mild detergent with water applies to tile, not grout.

DURABILITY

Residential floors and walls. Commercial walls and light traffic commercial floors.

We seek to continually improve and refine its products/offerings, and reserves the right to make changes in materials, specifications, and pricing without prior notice. For specific product information, please contact us.

Occasional variations in color, shade, tone and texture are to be expected in all glass products. Samples do not necessarily represent an exact match to existing inventory.

MADE IN TÜRKİYE | 100 % RECYCLED GLASS | NEW GENERATIONS PRODUCTS
